## 27. Electrical Characteristics

27.1 Absolute Maximum Ratings\*

| Operating Temperature55°C to +125°C   |
|---|
| Storage Temperature65°C to +150°C   |
| Voltage on any Pin except RESET with respect to Ground0.5V to V <sub>CC</sub> +0.5V |
| Voltage on RESET with respect to Ground0.5V to +13.0V                               |
| Maximum Operating Voltage   |
| DC Current per I/O Pin40.0 mA   |
| DC Current V <sub>CC</sub> and GND Pins200.0 mA and                                 |
| 400.0 mA TQFP/MLF   |

#### \*NOTICE:

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress rating only and functional operation of the device at these or other conditions beyond those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.

# 27.2 DC Characteristics

 $T_A = -40$ °C to 85°C,  $V_{CC} = 2.7V$  to 5.5V (Unless Otherwise Noted)
